About Department of Physics

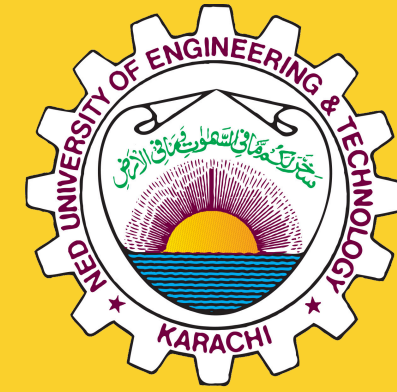

The Department of Physics has been established as an independent department in 2010. The tremendous growth in science and technology in the last few decades is in one way or the other, related to or based on fundamental principles of Physics. Indeed, there are entire industries which have grown out of development in specific areas of physics such as semiconductor device physics, optics, laser physics and medical physics. Besides an undergraduate programme on Applied Physics, a Master Programme in Physics was also launched with the purpose of producing scientifically and technologically motivated professionals. The structure of the Programme has been designed in such a manner that research-orientated graduates can undertake research projects.
